REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

The usefulness of the library is shown by its increased patronage, twenty-five hundred and eighty-five books having been loaned out the past year.

We were pleased to have brought to the library two books which belonged to the "Epsom Social Library," an association in existence in this town more than a century ago.

We have been favored the present year with a generous donation from Benjamin F. Webster of Portsmouth, who has previously shown his interest in his native town. He now gives a railroad bond of one thousand dollars, bearing interest at four per cent., the interest to be used annually in the purchase of useful books for the library.

REPORT OF SCHOOL BOARD.

In presenting this report the board have but little to say that is not already known to those who have an interest in the welfare of our public schools.

Ten different persons were employed as teachers during the year, all of whom labored faithfully for the good of the children under their care, yet the results of their efforts varied.

The scarcity of experienced teachers forced us to employ several who had never taught, some of whom did not succeed as we had hoped they would, yet we are pleased to learn that in other schools they have been successful. Doubtless their experience with us was useful to them.

The winter term was badly interfered with by sickness and difficulty in obtaining teachers.

The Center school was two weeks late in beginning.

At Gossville, Mrs. Edmunds declined to accept the position of teacher, much to our regret, yet very kindly consented to teach as a substitute until one could be secured, and after teaching three weeks Miss Brown of Deerfield came and finished the term.

Scarlet fever interrupted the Short Falls school one week and the Mountain four weeks, and it was thought best to close the latter after a six weeks' term, while the North Road school was shortened three weeks by the measles.

A change in some of the text-books has been made during the year.

Greenleaf's series of arithmetics, so long a familiar book in the schoolroom, has given place to Milne's.

Overton's Physiologies take the place of several kinds lately in use, and an entire change in music books was thought necessary.

Several needed repairs to schoolhouses and out-buildings that we intended to have had done the past season had to be deferred, not being able to obtain suitable help.

The enumeration of the children in the district between the ages of five and sixteen gave seventy-eight boys and fifty-six girls, a total of one hundred and thirty-four.
